

IFS Powder Coatings

Architectural Color Collection

IFS Coatings for Architectural Applications

IFS has a world class range of powder coatings designed to protect and decorate architectural metal to the very highest standards. Our architectural powder coatings are tough, weatherable, and meet and exceed each of the AAMA performance specifications, ensuring every level of exterior durability is available.

The Architectural Color Palette

The IFS Architectural Color Collection showcases just some of the colors available in the IFS range, from classic solid shades, to fine metallics and even anodic styles. We also understand that unique projects need unique colors. With that in mind, the **IFS Color Matching Service** allows you to get the exact shade you are looking for in an environmentally responsible, durable coating. We will analyze the shade using the latest color matching technology and create a color for you to approve. What's more, you can also change the gloss, or add metallic or textures to the product. Talk to your IFS architectural representative for more information on our exceptional color matching capabilities.

The IFS Architectural Color Matching Service

- Custom color creation available
- Available in standard polyester, super durable and fluoropolymer technology
- Change the gloss, add metallics or textures
- Industry leading color matching times
- Sample panels available free of charge
- Small batches available, perfect for prototypes or one off pieces

With any coating, powder or liquid, there are some limitations on what is achievable at the higher levels of exterior durability. Quite simply, the pigments for some shades (for example, bright yellow) that will offer the durability required for these specifications, are not available. However there is a vast range of colors that are available, and will meet the exterior durability demands of the high level specifications. Similarly, not all gloss levels or metallic effects can be achieved at an AAMA 2605 level. Talk to your IFS architectural advisor for advice.

AAMA Specification	AAMA 2603	AAMA 2604	AAMA 2605
IFS Product	IFS 300SP	IFS 400SD	IFS 500FP
Product chemistry	Standard Polyester	Super Durable Polyester	100% FEVE Fluoropolymer (70% PVDF liquid equivalent)
Warranty*	No warranty	5 or 10 year warranty	10 or 20 year warranty

*Warranty supplied when applied by an IFS Certified Applicator to aluminum.

The IFS architectural range has been used on a vast array of architectural applications, from residential windows and doors, commercial store front and retail interiors, to curtain wall, louvers, scrims and screens on skyscrapers and monumental buildings.

The IFS Architectural Color Collection

IFS architectural coatings offer a combination of great aesthetics, toughness, durability, cost effectiveness and are the obvious environmentally responsible choice. All of the colors shown on this card are available in AAMA 2603, 2604 and 2605 level products, so no matter what the project demands, we've got you covered. IFS 400SD, our super durable architectural product provides great exterior protection and improved color and gloss retention over a standard polyester product, while IFS 500FP, our world class Fluoropolymer offers the ultimate in long term durability, color and gloss retention and scratch resistance. For more information on the strict performance tests that IFS 400SD and IFS 500FP meet and exceed, please talk to your IFS representative.

Codes starting with "S" are AAMA 2604 compliant, IFS 400SD product codes.
Codes starting with "F" are AAMA 2605 compliant, IFS 500FP product codes.

TGIC-free products also available. Please ask for details.

IFS ARCHITECTURAL METALLICS

Classic Platinum
